

# 2024 Joint International Conference of Taiwan Liver Cancer Association and Taiwan Academy of Tumor Ablation

Update on the Management of Patients with Liver Cancer : Towards Personalized Medicine

5/18 Sat.(12:30-18:10)

| Time                                             | Topic                                                                                                 | Speaker                                                                                    | Moderator                                                                      |
|--------------------------------------------------|-------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------|
| 12:30-13:00                                      | Registration                                                                                          |                                                                                            |                                                                                |
| 13:00-13:30                                      | Free paper award presentation                                                                         | Awardee                                                                                    | Dr. Tsung-Jung Lin<br>TLCA Deputy Secretary General                            |
| 13:30-13:40                                      | Opening remarks                                                                                       | Prof. Yi-Hsiang Huang TLCA President<br>Prof. Cheng-Yuan Peng TLCA Annual Meeting Chairman |                                                                                |
| Session 1. HCC Surveillance and Diagnosis        |                                                                                                       |                                                                                            |                                                                                |
| 13:40-14:00                                      | MASLD-associated HCC: surveillance strategy and treatment perspective                                 | Prof. Pin-Nan Cheng<br>National Cheng Kung University Hospital                             | Prof. Chia Yen Dai<br>Kaohsiung Medical University, Chung-Ho Memorial Hospital |
| 14:00-14:20                                      | Biomarkers and risk models for prediction and diagnosis of HCC                                        | Dr. Chih-Lin Lin<br>Taipei City Hospital, Ren Ai Branch                                    | Prof. Yu-Lueng Shih<br>Medical Affairs Bureau Ministry of National Defense     |
| 14:20-14:40                                      | Diagnostic and prognostic role of EOB-MRI in HCC                                                      | Dr. Po-Chin Liang<br>National Taiwan University Hospital                                   | Dr. Chien-Hung Chen<br>NTU Cancer Center                                       |
| 14:40-15:00                                      | Coffee break                                                                                          |                                                                                            |                                                                                |
| Session 2. Precise and Safe Liver Tumor Ablation |                                                                                                       |                                                                                            |                                                                                |
| 15:00-15:05                                      | Opening by TATA President                                                                             | Prof. Chia-Chi Wang TATA President<br>Dr. Po-Heng Chuang TATA Meeting Chairman             |                                                                                |
| 15:05-15:20                                      | Get the exit in liver tumor ablation                                                                  | Dr. Po-Heng Chuang<br>Jen Ai Chang Gung Health                                             | Prof. Chia-Chi Wang<br>Taipei Tzu Chi Hospital                                 |
| 15:20-15:37                                      | The role of ablation in systemic treatment of advanced HCC                                            | Dr. Hung-Wei Wang<br>China Medical University Hospital                                     | Dr. Jen-I Hwang<br>Tungs' Taichung MetroHarbor Hospital                        |
| 15:37-15:54                                      | Perivascular hepatic tumor: MWA or SWC-RFA                                                            | Dr. Yi-Chung Hsieh<br>Linkou Chang Gung Memorial Hospital                                  | Prof. Chen-Chun Lin<br>New Taipei Municipal Tucheng Hospital                   |
| 15:54-16:11                                      | Microwave ablation to liver tumors at high risk location                                              | Dr. Ming-Feng Chiang<br>Lotong Poh Ai Hospital                                             | Prof. Chien-Wei Su<br>Taipei Veterans General Hospital                         |
| 16:11-16:28                                      | Contrast-enhanced ultrasound guidance in ablation of poor conspicuous hepatic lesions                 | Dr. Ching-Wei Chang<br>MacKay Memorial Hospital                                            | Prof. Chao-Hung Hung<br>Kaohsiung Chang Gung Memorial Hospital                 |
| 16:28-16:45                                      | Tackling Lesions Lurking Beneath the Brim                                                             | Dr. Shih-Jer Hsu<br>National Taiwan University Hospital                                    | Dr. Lein-Ray Mo<br>Tainan Municipal Hospital                                   |
| 16:45-17:00                                      | Panel Discussion                                                                                      | All Speakers                                                                               | Prof. Kai-Wen Huang<br>National Taiwan University Hospital                     |
| Satellite Symposium                              |                                                                                                       |                                                                                            |                                                                                |
| 17:00-17:35                                      | New Treatment Paradigm – Immunotherapies in the Intermediate hepatocellular carcinoma                 | Dr. Pei-Chang Lee<br>Taipei Veterans General Hospital                                      | Prof. Yi-Hsiang Huang<br>TLCA President                                        |
| 17:35-18:10                                      | Evolving Treatment Strategies for uHCC : The Combined Approach of Locoregional and Systemic Therapies | Dr. Shih-Jer Hsu<br>National Taiwan University Hospital                                    | Prof. Cheng-Yuan Peng<br>China Medical University Hospital                     |
| 18:30-21:00                                      | GALA DINNER                                                                                           |                                                                                            |                                                                                |

主辦單位:

台灣肝癌醫學會  
Taiwan Liver Cancer Association

協辦單位:

中國醫藥大學附設醫院  
China Medical University Hospital
